

# Oil Stain Removal

Article Number: 276 | Rating: Unrated | Last Updated: Wed, Sep 2, 2015 at 9:01 AM

**Q: What ingredients do I use to make a poultice for oil stain removal off of a stone tile? What ingredients do I use to make a poultice for oil stain removal off of a stone tile?**

A: The good news is, your stone is not damaged, but simply discolored from absorbing a staining agent, in this case oil. And it can be removed. Instead of a poultice to remove the oil, our experts recommend a good degreaser, available from a hardware or big box store. Follow instructions and that should do the trick.
